The Honorable Neal M. Kurk, Chairman Fiscal Committee of the General Court

Her Excellency, Governor Margaret Wood Hassan and the Honorable Council October 6, 2016 Page 2 of 3

EXPLANATION

The transfer is required within Accounting Unit 29500000, General Services Maintenance and Grounds to pay for emergency engineering services to convert state office buildings heated by Concord Steam to state owned heating equipment. The State has been buying steam from Concord Steam a Public Utilities Commission (PUC) regulated utility, to heat 25 state owned facilities in Concord. Concord Steam recently announced that it is planning to cease operations effective May 31, 2017 and is working with the PUC and customers toward a managed shut down. The estimated cost for the design, engineering, installation project management to replace these heat and hot water services with state owned equipment and decommission the existing plans is \$23.8 million. This has created an emergency need for the Department of Administrative Services to begin the design of new heating equipment for 25 state owned facilities, to be bid and contracted prior to the Concord Steam closing date. The cost to do the design and engineering work is estimated to be \$3.0 million, with \$1 million for preliminary engineering needed before issuance of the RFP in March 2017.

The legislature appointed the Joint Concord Steam Task Force to assist the Department of Administrative Services in assuring that state buildings have continued heat and hot water after the closure of Concord Steam. At their meeting on October 4, 2016 the Task Force recommended that Administrative Services request to transfer the funds from their utility class line to partially pay for the required engineering with the caveat that they could return to the Joint Fiscal Committee at a later date to request an additional appropriation to cover any shortfall in the FY 17 utility class line. Funding will be required to pay the utility shortfall beginning in December 2016 at which time DAS will request the Fiscal Committee and the Governor and Council to appropriate \$1 million pursuant to Chapter 275 Laws, of 2015, Agency Footnote, as follows;

Department of Administrative Services (DAS1410) appropriation budgeted in class 023 Heat-Electricity-Water, shall not lapse until June 30, 2017. In the event the expenditures are greater than amounts appropriated, the Commissioner may request, with prior approval of the Fiscal Committee, that Governor and Council authorize additional funding. Upon Fiscal Committee, and Governor and Council approval, the Governor is authorized to draw a warrant from money in the Treasury not otherwise appropriated.

The following is the information specifically required when transfers are requested, in accordance with the Budget Officer's instructional memorandum dated April 17, 1985, to support the above requested action.

- A. Justification: This transfer is required to pay for emergency engineering services that are required because of the 5/31/17 closure of Concord Steam and to assure that 25 state owned buildings have continuous heat and hot water.
- B. Does this transfer involve continuing programs or one-time projects? This transfer will pay for one time emergency engineering fees.
- C. Is this transfer required to maintain existing program levels or will it increase the program level? This transfer is required to maintain existing program levels; however upon project completion significant energy costs savings will be realized.
- D. Cite any requirements which make this program mandatory. The engineering is required to enable the State to have new heat infrastructure in place and operational by October 1, 2017 at two facilities and October 1, 2018 at the remaining 23 state owned facilities.
- E. Identify the source of funds on all accounts listed on this transfer.
- F. Will there be any effect on revenue if this transfer is not approved? There is no anticipated effect on revenue as a result of this transfer;

The Honorable Neal M. Kurk, Chairman Fiscal Committee of the General Court

Her Excellency, Governor Margaret Wood Hassan and the Honorable Council October 6, 2016 Page 3 of 3

- G. Are funds expected to lapse if this transfer is not approved? It is anticipated that there will be no lapse if this transfer is not approved; if the transfer is approve, an equal appropriation will need to be added to cover a shortfall in the 2017 utility class line.
- H. Are personnel services involved? No

The Department has conducted a detailed review of these line items in the budget to ensure that available funds are maximized to the greatest degree possible.

Respectfully submitted,

Vicki V. Quiram

Commissioner

Re: INFORMATIONAL ITEM: Health and Human Services Dashboard

Information

The Department of Health and Human Services (DHHS) hereby submits as an information item the department's monthly dashboard in order to inform the legislature and the public on the current status of the utilization of the department's programs and services and the related implications for the department's budget. Please note that financial and caseload information contained in this monthly dashboard is current through August 31, 2016 (SFY 17)

Explanation

Fiscal Year 2017 Funding Issues (Thousands)

SYSC	Footnote reduction SB466	\$1,722
NHH	Nursing shortfall - 15 % salary enhancement	\$478
TANF	Henricks Decision	\$78
	Medicaid	TBD
	Total	\$2,278

Medicaid Budget for SFY 2017

The Department's Medicaid accounts experienced a shortfall in SFY 2016 as a result of four factors. First, the managed care (per member per month) rate adjustment for SFY16 was not included in the budget for the managed care program. Second, the budget assumptions regarding a Medicaid caseload reduction of 2% in SFY16 were not realized; in fact, caseloads remained static in SFY 2016. Third, for a period of time in SFY16, mental health services were excluded from the managed care program and the fee for service rates in this period were higher than budgeted. Lastly, as a result of the federal government attempting to change the methodology of how uncompensated care is defined and litigation resulting from that attempted change, the amount of uncompensated care payments to the state's hospitals was significantly higher (\$15.9 million) than budgeted.

DHHS managed the SFY16 Medicaid shortfall by transferring general funds that would otherwise lapse from other areas within the Department. Even with covering the shortfalls, the unaudited SFY16 lapse from DHHS is estimated at \$16.0 million.

Some of these factors have or will be addressed in SFY 2017. The state's community mental health centers have successfully negotiated agreements with the managed care organizations for the provision of mental health services under a capitated rate, eliminating the higher costs associated with fee for service in that program.

The Honorable Neal M. Kurk Page 2 October 10, 2016

In addition, the state's prospective disproportionate share (DSH) payment to hospitals in May, 2017 should decrease significantly over the payment made in 2016 for two reasons. First, the federal government has now issued a proposed rule that would eliminate third party payments from the calculation of uncompensated care. Should this rule be finalized and applied back to 2015, then the uncompensated care for New Hampshire hospitals would decrease significantly in conjunction with the disproportionate share (DSH) payment due in May 2017. Uncompensated care costs for the state's hospitals in 2015 should also decrease due to the effect of the New Hampshire Health Protection program, which saw higher enrollment in 2015 over 2014. The DSH payment made to hospitals in May 2017 will be based on the hospital's 2015 uncompensated care costs.

The Medicaid budget in SFY 2017, however, will continue to be strained by the caseload assumptions made in the current budget, as well as actuarially required increases to the managed care pm/pm rates that were not budgeted. Specifically, the current budget projects an additional decrease in Medicaid caseloads in SFY17 at another 2%, in addition to the 2% expected from SFY16. Although quite early in the fiscal year, it does not appear that caseloads will decrease enough to cover the cumulative impact of the SFY16 and 2017 reduction. The Medicaid shortfall due to static caseloads is currently estimated at \$12.5m deficit for SFY17...

The rates for the managed care program as determined by the actuary have increased slightly again for SFY17. Without offsetting revenue or higher lapse in other parts of the department's budget, the rate increases could generate a shortfall of up to \$30 million by the end of SFY17. The composite average per member per month rate has increased since 2015 from \$331.00 to \$349.00. The MCO rates that were approved by the Executive Council in June 2016 will be in effect for SFY17. Rates are determined on an annual (fiscal year) basis.

The managed care program will have been in effect for three years as of December 1, 2016. Rate increases have been modest and consistent with other managed care programs nationally, averaging no more than 3.8% per year after adjustment for program changes (i.e., New Hampshire Health Protection Program coverage in 2015 which required payment of Medicare level rates).

Managed Care Re-Procurement

On October 5, 2016, upon the recommendation of the department, the Governor and Executive Council approved a one-year contract extension with the two existing managed care companies, Well Sense and NH Healthy Families, which will extend the existing contract to June 30, 2018. The contracts were set to expire on June 30, 2017.

The initial managed care program, as enacted under SB 147, was contemplated to run for an initial period of five years. The program, however, was 18 months late in beginning because of the inability of providers and the managed care companies to reach provider agreements. The extension of the current contracts for one additional year will allow the program to continue as contemplated, as well as to enable the state to plan for and execute a competitive procurement with sufficient time to transition managed care companies, should that be required, whether that transition involved the addition or replacement of one or more managed care companies.

The department will shortly issue Requests for Proposals (RFPs) for qualified consultants to help the department develop the RFP. Prior to the issuance of an RFP next spring, the Department will undertake an extensive stakeholder and public hearing process to obtain input into all facets of the program. The Department anticipates issuing the new RFP on or about May 1, 2017.

TANF - Fiscal Impact of Hendricks v. Department of Health and Human Services

At the August 5, 2016, meeting of the Joint Legislative Fiscal Committee, the department was asked about the potential fiscal impact of the New Hampshire Supreme Court's decision in the Hendricks case. In its opinion issued on August 2, 2016, the New Hampshire Supreme Court ruled unconstitutional a department administrative rule that required DHHS to include a child's federal Supplemental Security Income (SSI) in the calculation of a family's eligibility for benefits under the federal Temporary Assistance for Needy Families program (TANF), as administered by the State's Financial Assistance to Needy Families Program (FANF).

The Department reviewed the decision and has calculated the potential fiscal impact. For the reasons discussed below, the immediate fiscal impact is \$78,237 annually, based upon the 17 open cases with individuals under the age of 20 who are currently receiving federal SSI benefits. In addition, there were 109 applications for TANF over the past 6 months that were denied as being over income as a result of SSI benefits for a child in the household. Were all of those families to reapply and now qualify because of the exclusion of their children's SSI benefits, the increase in TANF expenditures would be approximately \$667,000 annually. Thus, the potential fiscal impact of the decision based on data from the past six months would be under \$750,000 per year assuming all families who were denied in that time frame re-applied and otherwise qualified.

The fiscal impact of the recent court decision is significantly lower than the TANF cost savings projected when the change in law was made in 2012 that included SSI income for purposes of TANF benefits. The projected cost savings in 2012 was based on including SSI income from both adults and children in nearly 1,500 open cases at that time. The court decision requires the department to exclude only those SSI benefits of children, and the number of open cases where there are children receiving SSI benefits are currently 17.

The fiscal impact of the decision is also lower than it might have been because the court decision is prospective only; it does not require the department to make any retroactive payments.

Developmental Disability (DD) Waitlist

The Department and the ten area agencies remain on track to serve 415 persons in the current biennium, as contemplated in the current biennial budget. However, more individuals than were budgeted are seeking services.

The Honorable Neal M. Kurk Page 4 October 10, 2016

On September 13, 2016, the Department submitted to the Health and Human Ovesight and Joint Legislative Fiscal Committees a repot on the status of the DD Waitlist. At the end of July 2016, there were a total of 166 persons waiting for alocation of funding for services. As explained in the letter, the SFY 2016 budget had assumed that a total of 262 people would be served in SFY 2016. A total of 383, however required services. In additon, the average cost of services in SFY 2016 was approximately \$51,000, which was about \$7,000 per person higher than budgeted. The combination of more pesons seeking services at a higher average cost of services resulted in an increased watlist.

That trend is continuing in the first months of SFY 2017. At the end of August, there were 182 persons on the DD Waitlist. In August, 8 persons came off the wait list and were funded for services, but 24 new persons came onto the waitlist. These new persons included 8 who were turning 21 and 16 persons who are older, but needed new or espanded services. The number of older persons requiring services has increased significantly.

The area agencies and department staff meet weekly to review all relavant information concerning the management of the waitlist. Plans have been developed and are now being implemented to provide funding to an additional 30 persons currently on the waitlist with existing budgeted funds.

One contraint in directing funding most efficiently is the separation of funds into waitlist and waiver services. That division of funds restricts the allocation of funds where they may most be needed. In the coming session of the legisalture, the department will seek changes to the budget that will combine the waitlist and the waiver funding lines.

Division of Children, Youth and Families (DCYF)

The Department this week is releasing an Interim Report on Assessment Staffing at DCYF that was done by the Center for the Support of Families. This interim report was requested by the department prior to the Center's final report to inform the development of the department's Fiscal Year 2018-2019 budget.

The Center for the Support of Families is undertaking a review of child protection activities of DCYF, including its practices, policies and resources, as well as DCYF's capacity to undertake the child protection goals established by the legislature. The Center's work has involved individual case reviews, interviews of DCY staff, families, law enforcement and advocates.

The Department requested this interim report to have available the Center's recommendations regarding child protection assessment staffing levels for budget and planning purposes. The Center's final report will be completed in accordance with its contract by the end of November.

The Center identifies five principle recommendations in the Interim Report:

- 1. Hire a sufficient number of assessment social workers to bring the total number of filled positions to 120, with the intent of reducing the current vacancy rate to at least 25%.
- 2. Hire a sufficient number of assessment supervisors to bring the total number of filled positions to 24, with the intent of reducing the current vacancy rate.
- 3. Resolve the current backlog of overdue assessments by assessing and closing open assessments that can be safely closed, and opening those where harm or threats of harm exist so that services can be provided through staff other than assessment workers.
- 4. Enforce the 60-day policy time frame for completing assessments on an ongoing basis so that a new backlog does not accrue; and
- Make deliberate efforts to provide for assessment staff well-being in order to reduce turnover and absences due to work demands.

The Honorable Neal M. Kurk Page 5 October 10, 2016

In anticipation of this interim report, I have already initiated filling 17 case assessment worker and 5 case assessment supervisor positions from existing vacant positions outside of DCYF. These positions would increase the total authorized caseworker positons to 102, which is still short of the 120 positions recommended by the Center for Support of Families in its Interim Report. The department's list of Prioritized Needs, which accompanies the department's Efficiency Budget, contains a placeholder for additional required positions.

These 22 positions are in addition to 21 positions required to implement the interim plan for 24/7 coverage, which the Department brought forward earlier this year and is in the process of recruiting for implementation.

Respectfully submitted,

ommissioner
