The Honorable Neal Kurk, Chairman  
Fiscal Committee of the General Court  
State House  
Concord, NH 03301

Dear Chairman Kurk,

I write in support of authorizing the Department of Health and Human Services, Division of Long Term Support and Services, Bureau of Developmental Services to transfer \$1,298,592 to fully fund the current Developmental Disability (DD) Wait List.

The Department of Health and Human Services (HHS) encumbered funds before Fiscal Year 2018 closed for the In Home Support waiver in order to provide funding for all of the individuals on the home support wait list at the beginning of Fiscal Year 2019. Due to conservative management HHS has subsequently fully funded the Home Support Wait List and there is a \$1,298,592 surplus of encumbered funds that would otherwise lapse at the close of Fiscal Year 2019.

As of July 31, 2018, there were 41 people on the DD Wait List. The transfer of these funds, which would otherwise lapse, will enable the Bureau of Developmental Services to distribute additional support to those individuals on the wait list. In short, our conservative management of the In Home Support Wait List has enabled HHS to realign their resources to meet our most pressing needs.

It is important to acknowledge that under our current system, we will always have a wait list. This is unacceptable as no Granite Stater should have to wait, hoping that their lot is called, for the services that their government has provided them. Solving this problem will require an innovative reform of how DD services are provided. I look forward to working with the legislature, stakeholders and advocates to find better ways to deliver these services.

Until we are able to reform the system this injection of funds is our best chance to ensure that we are meeting our promissory obligations to our citizens with developmental disabilities. Supporting individuals in the DD community has been a significant focus of my administration, beginning with my budget and continuing with the passage of House Bill 1817 this spring. We now have an opportunity to further support them by fully funding the DD Wait List.

Sincerely,

Christopher T. Sununu

#### EXPLANATION

The Department of Health and Human Services, Division for Behavioral Health, Bureau of Mental Health Services seeks approval to accept and expend ProHealth NH federal funds in the amount of \$1,508,931 from the Center for Mental Health Services, Substance Abuse and Mental Health Service Administration (SAMHSA). This request represents year 1 of a multi-year grant (September 30, 2018 – September 29, 2023). This grant does not have a matching funds requirement. A copy of the grant award is attached.

The ProHealth NH grant will be used to improve the health and wellness of young people with Severe Emotional Disturbance (SED) and Serious Mental Illness (SMI) ages 16-35 in New Hampshire. We will provide integrated physical health care and incentivized wellness interventions in combination with comprehensive behavioral health care within community mental health centers for young people with SED and SMI who have been hard to engage. Community health workers employed by the Community Mental Health Centers (CMHCs) will be used to engage cultural and linguistic minorities that are not yet engaged. The goal is to provide integrated screening, detection and treatment of physical health conditions and to improve and prevent future health conditions by implementing a wellness and health behavior change program to address obesity and smoking in their population.

Funds will be used for:

- Class 020 General office supplies.
- Class 037 Purchase of laptop computer.
- Class 038 Purchase of computer software.
- Class 039 Cell phone and conference calling expenses.
- Class 041 Audit fund set aside expense.

### SECTION IV – SM Special Terms and Conditions – 1H79SM080245-01

## **REMARKS**

#### **New Cooperative Agreement**

This Notice of Award (NoA) is issued to inform your organization that the application submitted through the **Promoting Integration of Primary and Behavioral Health Care (PIPBHC)** funding opportunity **SM-17-008** has been selected for funding. The PIPBHC Program, as authorized by the section 9003 of the 21st Century Cures Act, P.L. 114-255, and section 520K of the Public Health Service Act, as amended, included funds to:

- (1) promote full integration and collaboration in clinical practice between primary and behavioral healthcare;
- (2) support the improvement of integrated care models for primary care and behavioral care to improve the overall wellness and physical health status of adults with a serious mental illness (SMI) or children with a serious emotional disturbance (SED); and
- (3) promote and offer integrated care services related to screening, diagnosis, prevention, and treatment of mental and substance use disorders, and co-occurring physical health conditions and chronic diseases. SAMHSA expects that a continuum of prevention, treatment and recovery support services will be offered to consumers within the PIPBHC grant program.

---

The DIS should be consistent with information in your application regarding access, \*service use and outcomes for the program and include three components as described below. Questions about the DIS should be directed to your GPO. Examples of DIS can be found on the SAMHSA website at <http://www.samhsa.gov/grants/grants-management/disparity-impactstatement>.

\*Service use is inclusive of treatment services, prevention services as well as outreach, engagement, training, and/or technical assistance activities.

The disparity impact statement consists of three components:

1. Proposed number of individuals to be served and/or reached by subpopulations in the grant implementation area should be provided in a table that covers the entire grant period. The disparate population(s) should be identified in a narrative that includes a description of the population and rationale for how the determination was made.

2. A quality improvement plan for how you will use your program (GPRA) data on access, use and outcomes to monitor and manage program outcomes by race, ethnicity and LGBT status, when possible. The quality improvement plan should include strategies for how processes and/or programmatic adjustments will support efforts to reduce disparities for the identified sub-populations.

3. The quality improvement plan should include methods for the development and implementation of policies and procedures to ensure adherence to the Enhanced Culturally and Linguistically Appropriate Services (CLAS) Standards and the provision of effective care and services that are responsive to:

- a. Diverse cultural health beliefs and practices;
- b. Preferred languages; and
- c. Health literacy and other communication needs of all sub-populations within the proposed geographic region.

---

via eRA Commons.

### **Marginal**

By October 30, 2018, submit via eRA Commons.

The application received a Marginal Rating for Section B: Proposed Implementation Approach.

#### **Reviewers noted the following:**

Although the applicant organization provides three clear goals with several objectives, it does not seem to provide a measure for those objectives. In addition, it does not provide who will be responsible for each of the activities and provides statements instead as "CMHC staff" or "FQHC planning team". It is not clear whether or not the primary care and behavioral health direct services will begin no later than month four after grant award. For example, the Integrated Primary Care Milestones Recruitment (On site Primary Care provider) appears to be under months 7-9. The applicant organization also does not link the screening to treatment approaches. Although it states that it will use community health workers to engage deaf, LGBT and immigrant and other vulnerable populations, it does not describe how people with SMI and SED will be recruited or retained. Additionally, the applicant organization mentions deaf and immigrant communities; however it does not clearly take into consideration the language, beliefs, norms, values, and socioeconomic factors of these populations. Moreover, it does not describe how it calculated the projected number of unduplicated patients. The applicant organization does not discuss types, numbers of services or anticipated outcomes. Further, it does not provide a breakdown of how many clients will be enrolled in each of the three CMHCs. Although the applicant organization states that it will obtain releases to share information reciprocally among partners, it does not describe how consent will be tracked between agencies.

**To ensure that the recipient meets acceptable standards for this section, by October 30, 2018 you must submit in eRA (SAMHSA's Electronic Research Administration System) for review and approval a written response on the following:**

- (1) Measurable performance measures for each of the three goals and related objectives.
- (2) Identification of staff responsible for each of the proposed project activities.
- (3) Clarification of when primary care and behavioral health direct services will begin to be provided to the population of focus.
- (4) A description of how client screening will link to the proposed treatment approaches.
- (5) A description of how individuals with SMI and SED will be recruited and retained in the project.
- (6) A description of how your organization calculated the number of unduplicated individuals to receive services, annually and over the life of the project.
- (7) A detailed breakdown of types of services to be provided and the anticipated outcomes of each.
- (8) A detailed breakdown of the number of clients to be enrolled in each of the three CMHCs.
- (9) A description of how client consents will be tracked across agencies.
