Read it carefully before you invest or send money.

Trustee's Message to Participants

Dear Participant:

On behalf of the State of New Hampshire, I am pleased to provide you with your UNIQUE College Investing Plan (UNIQUE Plan) Annual Report.

Since its inception in July 1998, the UNIQUE Plan has had tremendous growth and this year is no exception. In fact, as of September 30, 2004, the UNIQUE Plan has nearly 249,000 accounts and \$2.6 billion in assets.

This Annual Report is important because it gives you, the Participant, the opportunity to review the UNIQUE Plan in depth. Contained within is information on how the various portfolios have performed, the portfolios' holdings and investment strategies. The Manager's Overview, a discussion with Ren Cheng, is a wonderful opportunity to hear directly from the UNIQUE Plan Portfolio Manager on information specific to the portfolios over the past 12 months, the market and investing environment, and his outlook for the 12 months ahead.

Thanks to participant feedback, we are pleased to report that, over the last year, several enhancements were made to the UNIQUE Plan:

- **Reduced the volume of account statements** mailed to you by consolidating 529 statements with other Fidelity accounts. You can now receive the information all on one convenient statement. To make things even simpler, you can elect to **suppress paper statements** altogether and view account statements online.
- **Enhanced performance information** on Fidelity.com/unique to include year-to-date numbers and **improved on-line functionality** to add or update automatic funding instructions.
- **Developed functionality via phone** to update allocations and withdrawals.

Saving for college is one of the biggest challenges that many of us will face as we prepare our children for their future. As Trustee of the UNIQUE Plan, I assure you that the Advisory Commission and I will continue to work with Fidelity Investments to ensure that the Plan is among the best available to you. We will continue to monitor issues in the mutual fund industry and, where appropriate, advocate for changes to industry practices and regulations.

Fidelity Investments has consistently been a leader in the mutual fund industry and I direct your attention to the letter from Mr. Edward C. Johnson, on the next page, on the mutual fund industry and Fidelity's commitment to remain a leader in the marketplace.

We have and will continue to act in the best interest of you, our Plan participants, as we strive to help meet your college savings goals. And as always, your feedback is welcome and appreciated.

Thank you for choosing the UNIQUE College Investing Plan. We look forward to serving your needs for years to come.

Sincerely,

Michael Ablowich
State Treasurer
State of New Hampshire

Chairman's Message

Dear Participant:

During the past year or so, much has been reported about the mutual fund industry, and much of it has been more critical than I believe is warranted. Allegations that some companies have been less than forthright with their shareholders have cast a shadow on the entire industry. I continue to find these reports disturbing, and assert that they do not create an accurate picture of the industry overall. Therefore, I would like to remind everyone where Fidelity stands on these issues. I will say two things specifically regarding allegations that some mutual fund companies were in violation of the Securities and Exchange Commission's forward pricing rules or were involved in so-called "market timing" activities.

First, Fidelity has no agreements that permit customers who buy fund shares after 4 p.m. to obtain the 4 p.m. price. This is not a new policy. This is not to say that someone could not deceive the company through fraudulent acts. However, we are extremely diligent in preventing fraud from occurring in this manner — and in every other. But I underscore again that Fidelity has no so-called "agreements" that sanction illegal practices.

Second, Fidelity continues to stand on record, as we have for years, in opposition to predatory short-term trading that adversely affects shareholders in a mutual fund. Back in the 1980s, we initiated a fee — which is returned to the fund and, therefore, to investors — to discourage this activity. Further, we took the lead several years ago in developing a Fair Value Pricing Policy to prevent market timing on foreign securities in our funds. I am confident we will find other ways to make it more difficult for predatory traders to operate. However, this will only be achieved through close cooperation among regulators, legislators and the industry.

Yes, there have been unfortunate instances of unethical and illegal activity within the mutual fund industry from time to time. That is true of any industry. When this occurs, confessed or convicted offenders should be dealt with appropriately. But we are still concerned about the risk of over-regulation and the quick application of simplistic solutions to intricate problems. Every system can be improved, and we support and applaud well thought out improvements by regulators, legislators and industry representatives that achieve the common goal of building and protecting the value of investors' holdings.

For nearly 60 years, Fidelity has worked very hard to improve its products and service to justify your trust. When our family founded this company in 1946, we had only a few hundred customers. Today, we serve more than 18 million customers including individual investors and participants in retirement plans across America.

Let me close by saying that we do not take your trust in us for granted, and we realize that we must always work to improve all aspects of our service to you. In turn, we urge you to continue your active participation with your financial matters, so that your interests can be well served.

Best regards,

Edward C. Johnson 3d

Performance: The Bottom Line

Performance

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns

Periods ended September 30, 2004	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE College Portfolio	3.75%	24.91%	32.90%
UNIQUE College Portfolio Composite	4.42%	23.62%	31.63%
LB Int Govt/Credit Bond	2.65%	41.11%	48.22%
LB 3 Month US T-Bill	1.09%	16.62%	23.89%
Dow Jones Wilshire 5000 Composite	14.76%	-0.22%	10.19%

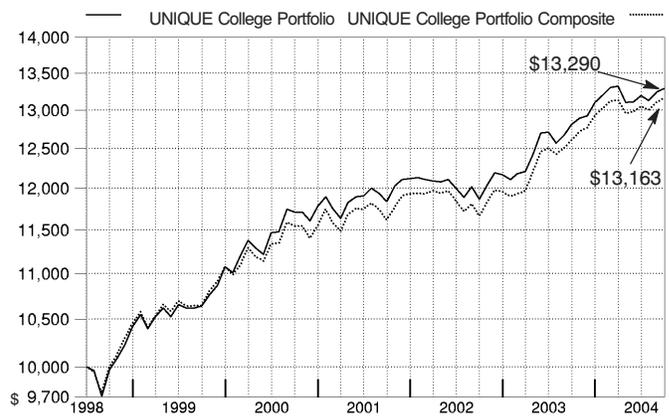

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on July 1, 1998. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE College Portfolio Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index, the Lehman Brothers 3-Month U.S. Treasury Bill Index, and the Dow Jones Wilshire 5000 Composite Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one year and five year time periods ending September 30, 2004 and for the period from July 1, 1998 to September 30, 2004.

Average Annual Total Returns

Periods ended September 30, 2004	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE College Portfolio	3.75%	4.55%	4.65%
UNIQUE College Portfolio Composite	4.42%	4.33%	4.49%
LB Int Govt/Credit Bond	2.65%	7.13%	6.49%
LB 3 Month US T-Bill	1.09%	3.12%	3.48%
Dow Jones Wilshire 5000 Composite	14.76%	-0.04%	1.56%

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

\$10,000 Over Life of Portfolio

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE College Portfolio on July 1, 1998, when the Portfolio started. As the chart shows, by September 30, 2004, the value of the investment would have grown to \$13,290 — a 32.90% increase on the initial investment. For comparison, look at how the UNIQUE College Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have grown to \$13,163 — a 31.63% increase.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Performance: The Bottom Line

Performance

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns

Periods ended September 30, 2004	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Portfolio 2003	4.23%	27.19%	38.00%
UNIQUE Portfolio 2003 Composite	4.96%	24.01%	34.78%
LB Int Govt/Credit Bond	2.65%	41.11%	48.22%
LB 3 Month US T-Bill	1.09%	16.62%	23.89%
MSCI EAFE	22.25%	-3.13%	7.72%
Dow Jones Wilshire 5000 Composite	14.76%	-0.22%	10.19%

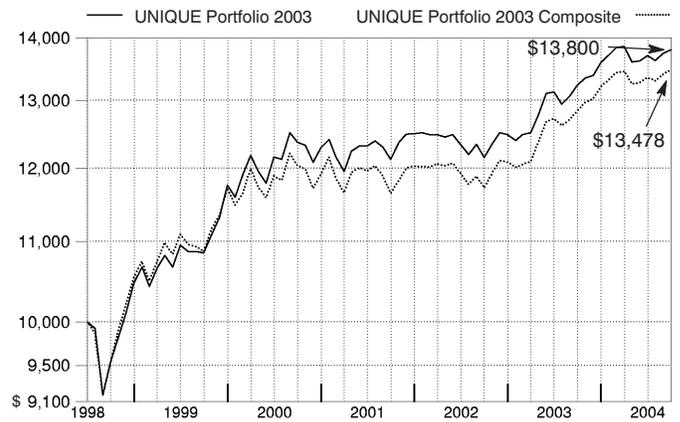

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on July 1, 1998. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

\$10,000 Over Life of Portfolio

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2015 on July 1, 1998, when the Portfolio started. As the chart shows, by September 30, 2004, the value of the investment would have been \$11,870 — an 18.70% increase on the initial investment. For comparison, look at how the UNIQUE Portfolio 2015 Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$11,476 — a 14.76% increase.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Performance: The Bottom Line

Performance

There are several ways to evaluate a portfolio's historical performance. You can look at the total percentage change in value, the average annual percentage change or the growth of a hypothetical \$10,000 investment. Total return reflects the change in the value of an investment.

Cumulative Total Returns

Periods ended September 30, 2004	Past 1 year	Past 5 years	Life of Portfolio
UNIQUE Portfolio 2018	11.05%	4.07%	12.60%
UNIQUE Portfolio 2018 Composite	14.45%	4.17%	8.43%
LB Int Govt/Credit Bond	2.65%	41.11%	41.59%
ML U.S. High Yield Master II	12.35%	33.97%	35.29%
MSCI EAFE	22.25%	-3.13%	3.03%
Dow Jones Wilshire 5000 Composite	14.76%	-0.22%	4.33%

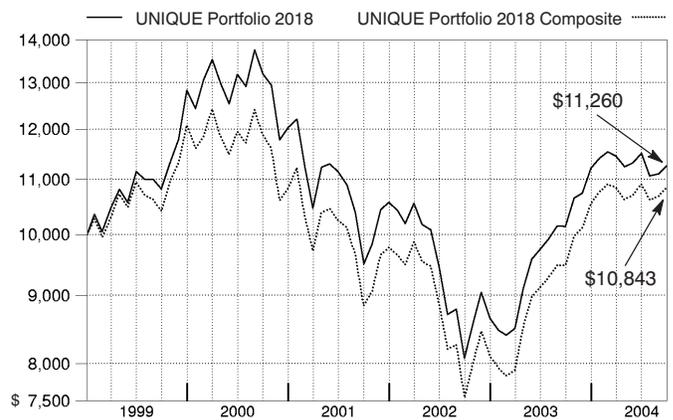

Cumulative total returns show the portfolio's performance in percentage terms over a set period of time — in this case, one year or since the Portfolio started on January 4, 1999. For example, if you had invested \$1,000 in a portfolio that had a 5% return over the past year, the value of your investment would be \$1,050. You can compare the Portfolio's returns to the performance of the UNIQUE Portfolio 2018 Composite Index, an approximate weighted combination of the following unmanaged indices: the Lehman Brothers Intermediate Government/Credit Bond Index, the Merrill Lynch U.S. High Yield Master II Index, the Morgan Stanley Capital International Europe, Australasia, Far East Index, and the Dow Jones Wilshire 5000 Composite Index. The index weightings are adjusted periodically to reflect the Portfolio's changing asset allocations. These benchmarks include reinvested dividends and capital gains, if any. The index returns are for the one year and five year periods ending September 30, 2004 and for the period from January 4, 1999 to September 30, 2004.

Average Annual Total Returns

Periods ended September 30, 2004	Past 1 year	Past 5 years	Life of Portfolio

Average annual total returns take the Portfolio's cumulative return and show you what would have happened if the Portfolio had performed at a constant rate each year.

\$10,000 Over Life of Portfolio

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE 100% Equity Portfolio on May 7, 2001, when the Portfolio started. As the chart shows, by September 30, 2004, the value of the investment would have been \$9,400 — a 6.00% decrease on the initial investment. For comparison, look at how the UNIQUE 100% Equity Portfolio Composite Index did over the same period. With dividends and capital gains, if any, reinvested, the same \$10,000 would have been \$9,939 — a 0.61% decrease.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Fund Talk: The Manager's Overview

An interview with Ren Cheng, Portfolio Manager of the UNIQUE Plan

Q. How did the UNIQUE Plan Portfolios perform during the past year, Ren?

A. During the 12 months ending September 30, 2004, the UNIQUE College Investing Plan's age-based Portfolios performed as we intended, meaning their absolute returns reflected performance that might be expected from a series of Portfolios with different age-appropriate, asset allocation risk levels. On a relative basis, each of the age-based Portfolios trailed their composite benchmarks by a small margin. *(For specific performance results on the age-based Portfolios and the static allocation Portfolios available in the UNIQUE Plan, please see the portfolio performance section of this report.)*

Q. What factors caused the age-based Portfolios to lag their respective benchmarks during the past year?

A. A few of the UNIQUE Plan's underlying domestic equity funds that invest primarily in companies displaying the strongest earnings growth — and frequently accorded higher valuations — trailed the Dow Jones Wilshire 5000 Composite IndexSM, the broader equity market index used in the UNIQUE Plan's composite benchmarks. Fidelity® Growth Company Fund, Fidelity Blue Chip Growth Fund and Fidelity OTC Portfolio all emphasized higher-growth companies, which weren't the sweet spot of the market during the 12-month period. These funds also were overweighted in information technology stocks relative to the DJ Wilshire 5000 Composite index throughout the period, and technology was the worst-performing sector of the benchmark. In addition, three underlying funds that generally own stocks with lower valuations — Fidelity Dividend Growth Fund, Fidelity Growth & Income Portfolio and Fidelity Fund — also trailed the DJ Wilshire index. Elsewhere, all of the age-based Portfolios, with the exception of the College Portfolio and the 2003 Portfolio, suffered from poor relative returns among their international holdings in Fidelity Overseas Fund and Fidelity Diversified International Fund. Both of these underlying funds trailed the return of the Morgan Stanley Capital InternationalSM Europe, Australasia, Far East Index, a broad benchmark of the international equity markets.

Q. Should UNIQUE Plan investors be concerned about the recent weak relative performance of most of the Portfolios?

A. It's always disappointing when a Portfolio underperforms its benchmark, but one year is a brief period in which to draw a meaningful conclusion. Securities markets historically have been very cyclical, and there's been increasing volatility during the past several years. Over longer periods of time, Fidelity's research and portfolio management staff has proven effective at selecting stocks of companies that produce

consistently strong earnings growth, and history has shown that stock prices tend to follow earnings growth. In my opinion, what's more important for investors to keep in mind is that each UNIQUE Plan Portfolio is structured with a carefully designed asset allocation that adjusts over time to reflect the investment horizon of an intended beneficiary. Maintaining the proper asset allocation throughout a specific investment time frame is a very significant determinant of any portfolio's likely outcome.

Q. Why is asset allocation so important?

A. The major asset classes frequently don't move in lock step; therefore, wise asset allocation can help keep an investor's portfolio on track toward reaching a specific financial goal — such as a beneficiary's college education — at some target date in the future. In my view, it's an important value that professional money managers can offer their customers. Upon joining Fidelity, I spent several years studying the historical performance of the various major asset classes, and much of that research was the genesis for the investment approach behind the UNIQUE Plan. Unfortunately, investors too often ignore the long-term benefits of continuously maintaining cross-class diversification, but shift instead to chase “hot” sectors at just the wrong time.

Q. Domestic equities, international equities and high-yield securities were the better-performing asset classes throughout the past year. However, both domestic and foreign stocks, as well as investment-grade bonds, had returns that were roughly flat during the past six months. Is this type of correlated market climate unusual?

A. Highly correlated market events happen from time to time. There were many external market factors for investors to digest during the past six months: rising interest rates, soaring oil prices, terrorist threats, the ongoing conflict in Iraq and presidential politics here at home. I suspect the complexity of these issues — and investors' shifting perceptions of their impact on various asset classes — caused the markets' uniformity. Typically, correlated markets have varying degrees of performance in the same direction, which underscores the importance of asset allocation. Further, history doesn't suggest correlated market conditions last for too long, and no one — not even the savviest investors — can predict which asset class will assume the leadership position going forward.

Q. High-yield bonds performed consistently well throughout the past year...

A. Yes, that's true. Once again, for those investors with a longer time period to invest, being diversified in multiple asset classes proved helpful. The two underlying high-yield funds — Fidelity Capital & Income and Fidelity High Income — both delivered double-digit returns that helped the UNIQUE Plan Portfolios' high-yield holdings perform roughly in line with the 12.35% gain for the Merrill Lynch® U.S. High Yield Master II Index.

Q. What's the most important thing for investors to consider going into 2005, Ren?

A. I'd say patience. As we've seen, the securities markets can be quite volatile. During the first half of the one-year period, equities performed very well. Conversely, the past six months haven't been particularly good for investors in equities, bonds or money market securities, so it's

reasonable to have experienced little or no growth and/or income from your UNIQUE Plan Portfolio during this period. Investors should take some comfort knowing that the disciplined investment approach behind the UNIQUE Plan's age-based Portfolios is a long-term strategy designed to help them navigate calmly through the inevitable ups and downs the securities markets experience at times. Maintaining the proper asset allocation increases the possibility of an investor avoiding the pitfalls of overweighting their portfolios in market areas where most of the gains have already been realized, or bailing out of areas that have been hard hit

— but are likely to rebound. When a loved one's higher education is at stake, I believe having an asset allocation that becomes increasingly more conservative as an intended beneficiary reaches his/her enrollment date is the best way to maximize return with a reasonable amount of risk.

During the coming months, I'll gradually reallocate each of the target investment mixes of the UNIQUE Plan's age-based Portfolios. The table below illustrates the target mix I'd like to achieve for each Portfolio on March 31, 2005.

	College	2003	2006	2009	2012	2015	2018	2021	Conservative	70% Equity	100% Equity
Domestic Equity Funds	20.00%	20.00%	28.17%	45.63%	55.64%	63.12%	64.37%	75.00%	—	60.00%	85.00%
International Equity Funds	—	—	1.25%	5.10%	6.50%	7.62%	7.88%	10.00%	—	10.00%	15.00%

Portfolio Facts

Goal: All of the age-based Portfolios seek capital appreciation with reasonable safety of principal, consistent with the ages of the beneficiaries for whom they are designed. There are three static allocation Portfolios. The investment objective of Conservative Portfolio is preservation of capital by allocating its assets among bond and money market funds. Income is a secondary objective. The investment objective of 70% Equity Portfolio is to maximize total return over the long term by allocating assets among stock and bond mutual funds. The investment objective of 100% Equity Portfolio is growth of capital over the long term.

Start date: July 1, 1998; except 2018, which started on January 4, 1999; 70% Equity Portfolio, which started on May 10, 2001; 100% Equity Portfolio, which started on May 7, 2001; 2021 and Conservative Portfolio, both of which started on December 13, 2001

Size: as of September 30, 2004, more than \$45 million (College); \$124 million (2003); \$298 million (2006); \$377 million (2009); \$389 million (2012); \$420 million (2015); \$400 million (2018); \$146 million (2021); \$55 million (Conservative); \$120 million (70% Equity); \$199 million (100% Equity)

Manager: Ren Cheng, since inception; manager, Fidelity Freedom Funds, since 1996; various structured investments for Fidelity Management Trust Company; joined Fidelity in 1994

Ren Cheng elaborates on the importance of maintaining a portfolio that is diversified among multiple asset classes:

“During the past several months, one of the questions I was asked quite frequently was, ‘If interest rates are rising, and the Federal Reserve Board has a stated bias toward gradually raising rates, why would an investor want to own bonds in his/her portfolio?’

“My simple answer was, ‘The UNIQUE Plan’s age-based Portfolios have a no-market-timing policy.’ It’s true that when rates rise bond prices tend to fall. However, no one — not even Federal Reserve Board Chairman Alan Greenspan, I believe — can predict the future of the economy. For example, what if the economy suddenly slows and the Fed decides no further rate increases are needed? Aren’t bond prices likely to stabilize or possibly move higher? Wouldn’t equity values likely tumble if the economy slows?

“More important than trying to predict short-term market events, I believe, is maintaining a long-term view. Owning a diversified portfolio can help investors avoid the costly mistakes associated with trying to shift in and out of asset classes and being caught overexposed to a single asset class at just the wrong time. The UNIQUE Plan’s age-based Portfolios are designed to provide returns that are correlated to the performance of several asset classes, with reasonable levels of risk that Fidelity’s investment management division believes are appropriate for helping an investor meet a specific savings goal over the course of a specific time frame.”

UNIQUE College Portfolio Investment Summary

Portfolio Holdings as of September 30, 2004

Notes to Financial Statements

For the year ended September 30, 2004

1. Significant Accounting Policies

The New Hampshire Higher Education Savings Plan Trust (the "Trust") was formed to establish and maintain a qualified tuition program under section 529 of the Internal Revenue Code of 1986, as amended. The Treasurer of the State of New Hampshire (State of New Hampshire) is the Trustee of the Trust. The Trust includes thirty-two investment Portfolios (the "Portfolios") as of September 30, 2004, eleven of which are offered under the name of the UNIQUE College Investing Plan (the "Plan"). These financial statements report on the Portfolios of the Plan, nine of which invest in equity, fixed-income, and/or money market funds, one of which invests in fixed-income and money market funds and one of which invests entirely in equity funds. The equity, fixed-income, and money market funds, collectively referred to as the Underlying Funds, are managed by Fidelity Management & Research Company (FMR). The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America which require management to make certain estimates and assumptions at the date of the financial statements.

The UNIQUE Portfolio 2003 will be liquidated and merged into the UNIQUE College Portfolio on or about December 31, 2004. The UNIQUE Portfolio 2024 will commence operations on or about December 31, 2004.

The following summarizes the significant accounting policies of the Portfolios:

Security Valuation. Net asset per value per unit is calculated as of the close of business of the New York Stock Exchange, normally 4:00 p.m. Eastern time. Investments in the Underlying Funds are valued at the closing net asset value per share of each Underlying Fund on the day of valuation.

Investment Transactions and Income. Security transactions, normally shares of the Underlying Funds, are accounted for as of trade date. Gains and losses on securities sold are determined on the basis of average cost.

Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date.

Expenses. Most expenses of the Trust can be directly attributed to a Portfolio. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with the Underlying Funds.

Units. The beneficial interest of each participant in the net assets of the Portfolios are represented by units. Contributions to and redemptions from the Portfolios are subject to terms and limitations defined in the Participation Agreement between the participant and the Trust. Contributions and redemptions are recorded upon receipt of participant's instructions in good order, based on the next determined net asset value per unit (unit value). Unit values for each Portfolio are determined daily. There are no distributions of net investment gains or net investment income to the Portfolios' participants or beneficiaries.

2. Fees

The State of New Hampshire has entered into a Management and Administrative Services agreement with FMR Corp. (the parent company of the group of companies commonly known as Fidelity Investments), Strategic Advisers, Inc. (Strategic) and Fidelity Brokerage Services, LLC (together Fidelity) to provide administrative, record keeping, marketing, and investment management services to the Trust.

According to this agreement and a related investment advisory agreement with Strategic, an investment adviser registered under the Investment Advisers Act of 1940, Fidelity receives a fee computed daily at an annual rate of .15% of net assets of the Portfolios. This fee is paid from a fee imposed by the State of New Hampshire equal to .30% annually of each Portfolio's net assets.

The remaining .15% is retained by the State of New Hampshire. In addition, each UNIQUE College Investing Plan account is charged a \$30 annual fee, which is waived under certain circumstances. Any annual fees imposed by the State of New Hampshire are in turn paid to Fidelity. Annual fees charged during the year are included in Cost of units redeemed and fees on the Statements of Changes in Net Assets.

Report of Independent Auditors

To the Fiscal Committee of the General Court of the State of New Hampshire, the Trustee of the New Hampshire Higher Education Savings Plan Trust and the Participants of The UNIQUE College Investing Plan:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of portfolio investments as of September 30, 2004, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of the New Hampshire Higher Education Savings Plan Trust: UNIQUE College Portfolio, UNIQUE Portfolio 2003, UNIQUE Portfolio 2006, UNIQUE Portfolio 2009, UNIQUE Portfolio 2012, UNIQUE Portfolio 2015, UNIQUE Portfolio 2018, UNIQUE Portfolio 2021, UNIQUE Conservative Portfolio, UNIQUE 70% Equity Portfolio, and UNIQUE 100% Equity Portfolio (collectively the “Portfolios”) at September 30, 2004, and the results of each of their operations, the changes in each of their net assets and each of their financial highlights for the periods indicated, in conformity with accounting principles generally accepted in the United States of America. The financial statements and financial highlights (hereafter referred to as “financial statements”) are the responsibility Portfolios’ management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimate made by management, and evaluating the overall financial statement presentation. We believe that our audits, which include confirmation of securities at September 30, 2004, by correspondence with the transfer agent, provide a reasonable basis for our opinion.
