The Department of Health and Human Services was contacted for a fiscal note worksheet on January 9, 2023, which they have not provided as of January 11, 2023.

METHODOLOGY:

This bill clarifies that a person does not gain or lose residency while in a hospital, treatment program center, or emergency housing until such time as they have acquired a more permanent residence. In the case of a person who leaves emergency housing voluntarily or due to noncompliance with housing rules, the bill states that the individual shall remain a resident of the municipality of origin for 30 days. In addition, the bill establishes that when a person was previously assisted by a municipality or other assistance provider but then self pays for a consecutive 30 days without assistance, that person's residency shall be transferred to the new municipality for local welfare purposes. Finally, the bill requires municipalities to coordinate assistance options with other municipalities when it is determined unreasonable for the person to physically return to the municipality of origin.

The New Hampshire Municipal Association states that due to the complexity of local welfare budgets, it is unable to determine the bill's impact. However, the Association assumes that the bill will more closely tie individuals to their municipality of origin while in emergency housing, which may reduce costs for municipalities with emergency housing while increasing costs for municipalities without such housing.
