EXPLANATION

Pursuant to US Treasury 31 CFR Part 35, RIN 1505-AC77, the Coronavirus State Fiscal Recovery Fund established under the American Rescue Plan Act includes New Hampshire State funding for Broadband Infrastructure, to ensure that all New Hampshire citizens have access to affordable broadband, with adequate speeds for downloading and uploading, provided to unserved and underserved households and businesses. The infrastructure must be sufficient to enable users to meet household needs of simultaneous work, education and health applications and robust enough to meet increasing demand for bandwidth, as residents have a broad range of needs which may change over time.

In order to meet federal requirements for program design, implementation and compliance, BEA will use these funds to hire a staff of three who will be tasked with both fulfilling the objectives of the program and the necessary extensive reporting requirements of the grant. Staff will design and implement the broadband infrastructure program through the use of contractors, state, municipal, and community partners.

As a result of the COVID-19 public health emergency, the necessity of a good internet connection to ensure families and businesses could continue to function was highlighted, as adults tried to work from home, children to attend classes online, individuals to obtain healthcare online and businesses move operations online. The disparity of those living in low or no connectivity area was highlighted. Broadband has become critical for people to carry out their daily lives.

Class 020 – Current Expenses – office supplies, paper and printer ink for staff

Class 022 – Rents – Leases – office space for staff
