Commission created to study state building and fire codes

CONCORD, NH – Senator Sharon Carson (R-Londonderry), issued the following statement today regarding SB106 being signed into law:

“Now that SB106 is law, a commission will look at creating a standard procedure and timeline for adopting changes to state fire and building codes -- something that is overdue and supported by our state fire marshal and the New Hampshire Building Officials Association. The inconsistencies between these two types of codes need to be worked out so city planners, builders and inspectors are all on the same page. I look forward to the commission's recommendations regarding providing more clarity on these codes.”
